

Principal Software Engineer / Architect

We are looking to hire a Principal Software Engineer & Architect to join a global team building out a world-class FinTech platform. If you're hard-working, dedicated, and want to be part of a major disrupter in Healthcare and FinTech industries, please read further. You must be very comfortable working with Javascript/React/Java, MySQL, AWS, and cloud-based architecture.

Position: Principal Software Engineer & Architect

Responsibilities

- Work with the engineering team to create a target-state architecture for the application.
- Act as the Technical Product Owner, partnering with the Scrum Manager and Scrum Masters to continuously improve the architecture/code.
- Implement, troubleshoot and maintain solutions across the stack (React.js, Java Spring Boot, Aurora MySQL)
- Solving bottlenecks - Working within an Agile/Scrum team environment
- Working with cross-functional teams - Writing clean, scalable, and testable code
- Work as part of a software development team leading and mentoring junior developers
- Debug and resolving technical issues
- Make recommendations to existing job infrastructure and drive implementation
- Continually engage in professional development
- Develop documentation and architectural specifications
- Lead an Architectural Review Board to address new requirements, performance improvements, scalability of applications
- Provide technical leadership to one or more Scrum development teams.

Qualifications

- 9+ years working experience - Proven experience as a team leader/mentor
- 4+ years of React.js and 9+ years of Java experience
- Expert level in software programming and best practices
- Bachelor's degree or higher in Computer Science/Information Systems preferred
- Professional IT Certification, preferred
- Must possess excellent communication skills and be able to communicate with a variety of technical teams and positions.
- Legal authorization to work in the U.S. is required.

Experience working with AWS stack of technologies including:

- EC2, Aurora (MySQL), S3, Okta, AWS Build, JUnit, IntelliJ
- BitBucket/Jenkins/Jira/Confluence
- Dell Boomi experience is a plus; Experience using other Enterprise Application Integration platforms is acceptable.

Total Compensation

Competitive Salary + Stock Options, Full Benefits (Medical, Dental, Vision), PTO, Life Insurance, 401

Legal authorization to work in the U.S. is required.
